 - A UST with more volume capacity than the UST being replaced if the added capacity is the result of a transfer of capacity in accordance with §713.612;
 - Multiple USTs where the combined volume capacity of all replacement USTs is less than or equal to the UST being replaced; or
 - Multiple USTs where the combined volume capacity of all replacement USTs is greater than the UST being replaced if the added capacity is the result of a transfer of capacity in accordance with §713.612;
- Installation or construction of new or replacement piping;**
- An upgrade to proper containment in accordance with §713.605(c);**
- An upgrade to proper containment in accordance with §713.607(c);**
- Installation or construction of a new UST through a transfer of capacity in accordance with §713.612; or**
- Installation or construction of a new Aboveground Storage Tank (AST) in accordance with § 713.605(a).**

Submission of Information: Please select the scenario that best describes your project.

Now that you have selected the type of Major Modification that describes your project, please provide a detailed description of the proposed project. The description is to include a narrative explanation establishing how the proposed project satisfies the rules referenced within the scenario that you selected. If applicable, the description must establish how the containment requirements of §713.606 and/or §713.608 of the EAA rules will be achieved. Include all necessary documentation including site location map(s), facility diagram(s), manufacturer's product sheet(s), piping, tank and containment schematics. Attach additional pages if necessary. Please note, proper containment is to be provided for the tank(s) and all associated piping.

V - ADDITIONAL REQUIREMENTS: Please acknowledge the following:

- I acknowledge that, per EAA rule 713.604 (g), the Owner or Operator of an AST or UST located on the Recharge Zone may not fill the AST or UST unless a **registration** for the AST or UST is on file and approved by the Authority.
- I acknowledge that, per EAA rule §713.605, No person may install or construct a regulated AST in, above, or on the Recharge Zone unless the construction of the AST complies with the major modification process in Section §713.609 or its associated exemptions.
- I acknowledge that, in accordance with §713.609 of the EAA rules, an approval letter for this application must be provided from the EAA General Manager prior to the commencement of construction of any activities associated with the Major Modification.
- I acknowledge that, in accordance with §713.610 of the EAA rules, an Owner or Operator shall provide notice to the EAA **at least thirty days** prior to the intended commencement of construction associated with an AST or UST.
- I acknowledge that, in accordance with §713.610 of the EAA rules, an Owner or Operator shall provide notice to the EAA **at least two business days** prior to the actual commencement of construction associated with an AST or UST.
- I acknowledge that, issuance of an EAA General Manager approval letter for this application does not relieve the Owner or Operator of a UST from the responsibility of complying with the requirements of the Recognized Capacity Program for Underground Storage Tanks, please see §713.612 of the EAA rules.
- I acknowledge that, all applicants are responsible for meeting any other applicable federal, state, or local laws and regulations regarding aboveground or underground storage tanks. Compliance with EAA rules does not relieve the Owner or Operator of an AST or UST from the responsibility of compliance with any other rules directly and/or indirectly affecting the AST or UST and any associated stored regulated substances.
