

DRAW THE COMAL SPRINGS RIFFLE BEETLE

The Comal Springs riffle beetle is an endangered species that can only survive in clean, cool water. The beetle is known as an indicator species--as its population levels tell a story about the health of the entire Edwards Aquifer ecosystem.

STEP 3: THE FEET*

STEP 4: THE ANTENNAE

STEP 5: ADD COLOR + PATTERN

STEP 6: BELLY HAIR*

* Not pictured:
The beetle has water-resistant
hairs on the underside of its body
and uses them to maintain a thin
bubble of air to breathe as it swims
in the aquifer.
